TECHNICAL SKILLS

LANGUAGES & CORE:	STATE & DATA:	TESTING & QUALITY:	TOOLING & DELIVERY:	PRACTICES:
Typescript	React Query	Jest	Git / GitHub Actions (CI/CD)	Modular/component architecture
JavaScript (ES2023+)	Context API	React Testing Library	Webpack/Vite	Responsive design
React	Redux	Playwright	Lighthouse/Web Vitals	AI-assisted development (Claude Code, local LLM workflows, agents)
NextJS	GraphQL	Cypress	WCAG	
NodeJS	MongoDB	TDD - unit / integration / E2E	Storybook	
HTML5 / CSS3 / SASS	REST APIs		Figma / Photoshop	
Python			Kubernetes (working knowledge)	

PROFILE

Senior software engineer with 10+ years building production web applications, focused on React and TypeScript at scale. Founding-team experience taking developer-tools products from MVP to flagship. I design maintainable, scalable frontend architecture and can own delivery end to end, from data layer to interface, using AI-assisted workflows to move quickly without sacrificing code quality. A prior decade in design and UX means I bridge product, design, and engineering rather than just consuming specs.

EXPERIENCE

Senior Frontend Engineer at Diagrid

September 2022 - July 2026

Founding-team engineer. Built Conductor, then built the Catalyst MVP and owned its frontend architecture as the team took it to flagship.

- Led the Catalyst frontend, including a complex workflow-execution visualiser handling 1000's of nodes with real-time stats; a differentiating feature that directly attracted several customers.
- Built the automated testing suite and improved CI, cutting production bug reports by 60%
- Contributed to the Dapr open-source JavaScript SDK (Workflows and the Conversation API); built quickstarts and sample workflows in Node.js and Python, and occasionally contributed to the Node.js backend.
- Shaped product design and UX for Catalyst
- Built AI agents and reusable skills letting non-technical teammates safely ship marketing site changes, reducing engineering requests by 50%
- Improved First Contentful Paint by 76% on the marketing website.

Senior Frontend Engineer at Jetstack

January 2021 - September 2022

- Led development and frontend architecture of the Jetstack Secure Platform.
- Rebuilt product documentation as a single Next.js + MDX application
- Contributed to deployment pipelines and mentored 4 backend engineers into frontend work; supported design and marketing on the company site.
- Contributed to the Cert-Manager website

Frontend Engineer at PurpleBricks

May 2019 - January 2021

- Built Search, Listings, and a new refunds application across a high-traffic property platform.
- Increased the web application performance by 35%
- Led migration from Redux to React Query + Context across 3 micro-frontends
- Contributed heavily to the design system; mentored 4 junior engineers

Frontend Developer at Phoebus Software LTD

May 2018 - May 2019

- Owned the frontend of the web entry point for banking-sector clients
- Built a configurable form builder with VueJS, TypeScript, and Webpack; improved application UX by reducing time to finish filling loan applications form by 38%

Software Engineer / UI Designer (Freelance, part-time)

2009 - 2022

Technical partner to founders and product teams: architecture, frontend builds, and product/UX, often as the sole engineer.

Selected work:

- Rapticore (rapticore.com, 2019 - 2022) — Led a team of 4 frontend engineers for 3 years building a cybersecurity observability platform, owning frontend architecture and direction
- Romanian Association of Medical Students: Built an online mock-exam application end to end, including the backend, supporting up to 5,000 concurrent students per sitting with no drop in performance.
- iFootage Gear: built the e-commerce site and participated in marketing campaigns planning and collateral creation. Increased sales by 18%
- Mention Me: Frontend and marketing builds serving UK retail brands (Debenhams, Radley, OVO Energy, JosephJoseph, and others)
- Stard.io: Built their marketing and web application frontend.

Lead Frontend Developer / Designer at iintegra / Workvine (Flex Recruitment spin-offs)

August 2015 - May 2018

At Workvine was part of the founding team, I've developed a series of its IP technologies. Have led a team of 2 junior designers. At iintegra I've implemented, rebuilt and maintained their Applicant Tracking System's (ATS) frontend as well as leading its design direction and user experience.

EDUCATION

BA (Hons) Creative Digital Media and Illustration

University of Worcester, UK

2011 - 2014

Final year projects included a web application for teaching children spanish and designing of a mobile game user interface.

Math and Computer Science

Danube Lyceum, Romania

2003 - 2007
